Highlights

18 dB amplification

Up to 18 dB amplification boosts weak signals, expanding your reception range and allowing you to receive more signals over a greater distance.

Compact design

The compact design of this antenna will easily blend in with your home decor.

Single dipole with tilt

The single dipole with tilt is a simple, single element design that receives both horizontal and vertical broadcast signals. As signals may be either horizontally or vertically polarised, it is important to be able to adjust for both.

Weighted base

The weighted base stabilises the antenna's position so you enjoy more positioning choices.

Noise reduction filter

Noise reduction filter to protect against signal loss

PVC/BFR free

This product does not contain PVC and BFR materials, which helps protect the environment.
